

‘Alya Humaira Binti Abdul Kadir

SOC Analyst (Entry-Level)

Phone: (+60)12 850 4418 | Email: halya8928@gmail.com | LinkedIn: <https://www.linkedin.com/in/alyira/>

Github: <https://github.com/halya-maker>

Professional Summary

Highly analytical and detail-oriented cybersecurity professional targeting a Security Operations Center (SOC) Analyst Level 1 position. Possesses hands-on experience in Managed Security Service (MSS) and enterprise environments. Skilled in continuous security monitoring, alert triage, and incident response lifecycle management using SIEM platforms such as Splunk. Proficient in conducting log analysis, threat intelligence correlation, and escalating verified security incidents in strict adherence to Service Level Agreements (SLAs) and Standard Operating Procedures (SOPs). Demonstrates a robust foundation in network security, TCP/IP protocols, and threat actor techniques mapped to the MITRE ATT&CK framework.

Education

Bachelor of Computer Science (Hons.) Computer Networks

Oct 2022 – Mar 2026

Universiti Teknologi Mara (UiTM) Jasin, Melaka | CGPA: 3.32

Work Experience

SOC Analyst Trainee (Under K-Youth Development Programme)

Apr 2026 – Present

Weststar Engineering Sdn Bhd, Ampang

- Performed SOC Level 1, including the continuous monitoring of network traffic, system logs, and security events to identify potential threats and vulnerabilities.
- Utilize threat intelligence and external attack surface management platforms, specifically CybleVision and CloudSEK, to identify, evaluate, and monitor emerging cyber threats.
- Document security incidents, maintain detailed logs of operational activities, and manage alert workflows using the internal proprietary ticketing system.

SOC Analyst Intern (MSS Environment)

Sept 2025 – Mar 2026

Nexagate Sdn Bhd, Kuala Lumpur

- Performed SOC Level 1 monitoring operations by analyzing over 50 daily security alerts utilizing Splunk SIEM to detect malicious activities across client networks.
- Conducted initial incident triage, validated security alerts to ensure high true-positive accuracy for clients, and escalated confirmed threats to Tier 2 analysts in accordance with established playbooks.
- Managed the full lifecycle of incident tickets within the NSI Unified Security Management system, ensuring accurate documentation and categorization aligned with client-specific Service Level Agreements (SLAs).
- Assisted senior analysts in the investigation of suspicious emails and potential phishing incidents to determine malicious intent and prevent successful compromises.
- Deployed and validated ESET endpoint security agents across 40+ devices, ensuring comprehensive operational visibility and endpoint protection.

- Monitored Imperva Web Application Firewall (WAF) dashboards to generate daily situational reports, successfully identifying web-based threats including SQL injection, Cross-Site Scripting (XSS), and DDoS activities.
- Executed DNS monitoring and anomaly detection across 11 domains utilizing DNSViz to identify misconfigurations and mitigate potential network risks.

Projects

Splunk SIEM Analysis – APT Threat Hunting (PowerShell Empire)

Dec 2025 – Jan 2026

- Conducted advanced threat hunting utilizing Splunk SIEM to detect fileless malware execution and identify malicious attacker behavior associated with PowerShell Empire.
- Analyzed Windows Security Logs and Sysmon telemetry to identify encoded PowerShell execution, suspicious parent-child process relationships, and the abuse of trusted binaries.
- Developed custom Search Processing Language (SPL) detection queries to identify Windows Management Instrumentation (WMI) execution, command-and-control (C2) communications, and system persistence techniques.
- Correlated event logs to uncover stealth attack patterns, mapping all observed tactics and techniques to the MITRE ATT&CK framework to propose effective mitigation strategies.

DNS Performance Benchmarking Toolkit (Final Year Project)

Oct 2024 – Jul 2025

- Developed a Python-based DNS testing toolkit utilizing dnssperf and SmokePing to benchmark resolver performance across major Internet Service Providers (ISPs).
- Tested network performance using high-traffic domains under real-world conditions, analyzing key metrics such as latency, jitter, uptime, throughput (QPS), and query success rates.
- Evaluated advanced network security features including DNSSEC, DNS over HTTPS (DoH), and DNS over TLS (DoT).
- Automated testing workflows and data visualization using Pandas and Matplotlib to identify, report, and document network performance trends.

Skills

- **Security & SOC:** SIEM Monitoring, Alert Triage, Incident Response, Log Analysis, Threat Detection, IOC Analysis, MITRE ATT&CK Framework, Vulnerability Management.
- **Security Tools:** Splunk (SIEM), CybleVision, CloudSEK, ESET (EDR), Akamai (WAF), Imperva (WAF), NSI Unified Security Management, Wireshark, Nmap, Firewalls, IDS/IPS.
- **Networking Concepts:** TCP/IP, DNS, DHCP, VLAN, WAN, Routing & Switching, Network Protocols, Packet Analysis.
- **Programming & Systems:** Python, PowerShell, SQL, Java, C++, Linux OS, VMware, VirtualBox.
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Adaptability, Ability to Work Under Pressure, Technical Documentation, SLA Management.

Certifications

Google Cybersecurity Professional Certificate (2026)

Google AI Professional Certificate (2026)

CCNAv7: Enterprise Networking, Security, and Automation – Cisco Network Academy (2025)

CCNAv7: Switching, Routing, and Wireless Essentials – Cisco Network Academy (2024)

CCNAv7: Introduction to Networks – Cisco Network Academy (2024)

Training

TryHackMe – Pre Security Learning Path

- Hands-on training covering networking, Linux CLI, web fundamentals (DNS, HTTP), and core security concepts

TryHackMe – Cybersecurity Path (Ongoing)

- Practical labs focusing on threat detection and core security fundamentals.

TryHackMe – SOC Level 1 Path (Ongoing)

- Hands-on threat detection, log analysis, and alert triage in simulated SOC environments.

Languages

- **Malay:** Native Proficiency
- **English:** Full Professional Proficiency
