

Internship Presentation

Student Name: 'Alya Humaira Binti Abdul Kadir

Student ID: 2022490964

Company: Nexagate Sdn. Bhd.

Academic SV: Nurul 'Azwa Kamarudin

Industrial SV: Muhd Syahmi Bin Abd Rahim

NEXAGATE

simplifying *cybersecurity*

Company Background

Background

- Malaysia-based cybersecurity company
- Specialised in consulting & managed security services
- Supporting organisations across multiple industries
- Focused on enterprise and government cybersecurity needs

Established: Over 15 years of cybersecurity experience

Location: Malaysia (serving organisations across Asia)

Clients: Trusted by 400+ customers in Southeast Asia

Cybersecurity as a Service

SOC-as-a-Service

Compliance-as-a-Service

PenTest-as-a-Service

Technology Platform

Certifications

Internationally Certified

CERTIFIED TO ISO/IEC 27001:2013
CERT. NO. : ISMS 00135

0074

Department Attached Structure

Department Role

- Continuous security monitoring
- Alert analysis & escalation
- Threat detection & reporting
- Incident support

Intern Role (SOC Level 1)

- Support 24x7 Monitoring Team (Security Analysts)
- Monitor security events
- Review & document alerts
- Prepare situational reports
- Office hours: 9:00 AM – 6:00 PM

Tasks Overview

Task 1:
Threat Intelligence & Reporting

Task 2:
Situational & DNS Monitoring

Task 3:
Alert Handling & Incident Support

Task 4:
**Web Application Firewall (WAF)
Monitoring & Analysis**

Task 1:

Threat Intelligence & Reporting

The screenshot displays the OpenCTI platform interface. The top navigation bar includes links for Reports, Groupings, Malware Analyses, Notes, and External references. A search bar is located on the right. The left sidebar contains a menu with options: Dashboard, Analyses, Cases, Events, Observations, Threats, Arsenal, Techniques, and Entities. The main content area shows a list of threat reports with columns: TITLE, TYPE, AUTHOR, CREATORS, LABELS, DATE, STATUS, and MARKING. The filters at the top indicate 'Marking definition: TLP:CLEAR' and 'Author: AlienVault'. The table lists five reports, all of type 'threat-report' and authored by 'AlienVault'. The reports include details on infrastructure patterns, campaign targeting, AlinaPos malware, Sunburst backdoor, and a PurpleFox botnet.

	TITLE	TYPE	AUTHOR	CREATORS	LABELS	DATE	STATUS	MARKING
☐	Infrastructure Patterns Lead to More Than 30 Active ...	threat-report	AlienVault	[C] AlienVault	apt29 espionage	Aug 3, 2021	NEW	TLP:CLEAR
☐	Campaign Targeting Aerospace and Defense	threat-report	AlienVault	[C] AlienVault	No label	May 30, 2018	NEW	TLP:CLEAR
☐	AlinaPos Malware	threat-report	AlienVault	[C] AlienVault	alina alinapos	Jul 17, 2017	NEW	TLP:CLEAR
☐	Sunburst backdoor – code overlaps with Kazuar	threat-report	AlienVault	[C] AlienVault	apt kazuar ru_apt	Jan 11, 2021	NEW	TLP:CLEAR
☐	PurpleFox botnet exploiting PrintNightmare in cryptoc...	threat-report	AlienVault	[C] AlienVault	cve-2021-34527	Jul 9, 2021	NEW	TLP:CLEAR

Analysis

- Reviewed cyber threat reports
- Analysed attack methods & behaviour

Key Findings

- Identified key IOCs
- Mapped to MITRE ATT&CK

Tool

- OpenCTI Platform

Task 2:

Situational & DNS Monitoring

Monitoring

- Monitored web security events
- Reviewed attack trends & anomalies

DNS Checks

- Performed hourly DNS monitoring
- Identified abnormal SOA values

Tools

- Imperva WAF
- DNSViz

Task 3:

Alert Handling & Incident Support

Alert Review

- Reviewed IPS / IDS alerts
- Analysed alert context & severity

Classification

- Determined True / False Positive
- Updated alert status

Tool

- Splunk Mission Control

Task 4:

Web Application Firewall (WAF) Monitoring & Analysis

Analysis

- Analysed web-layer security events
- Identified common attack patterns

Protection

- Reviewed blocked vs attempted attacks
- Assessed WAF effectiveness

Tool

- Akamai WAF Platform

Other Task

Endpoint Deployment

- Assisted in WithSecure endpoint deployment
- Deployment performed for MyMahir trainees

Teamwork

- Worked together with other interns
- Provided basic installation support

Verification

- Checked agent installation status
- Ensured endpoint connectivity

Conclusion

Technical Growth

- Gained hands-on experience in SOC monitoring, alert handling, and threat analysis.

Professional Exposure

- Worked with real-world cybersecurity tools in a managed security operations environment

Career Direction

- This internship strengthened my interest in cybersecurity operations and SOC-related roles

The background features a pattern of 3D cubes in various sizes, some appearing to float and others resting on a surface. A solid red horizontal bar is positioned below the text. The bottom of the image is divided into a dark grey triangle on the left and a red trapezoid on the right.

Thank you!
